

# ENCAP *EC*

## Encapsulating Cleaner

### BONNET

**Encap EC** (Encapsulating Cleaner) is a crystallizing copolymer cleaning solution for use with bonnet or brush carpet maintenance systems. Specially formulated Encap EC breaks down grease, releasing dirt from carpet fibres quickly and easily, allowing soil to be absorbed onto the bonnet pad, or suspended in crystal form for later vacuuming when using a brush system, leaving behind clean bright carpet fibres. The crystallizing copolymer technology in this cleaning detergent, encapsulates remaining soil within the carpet into a crystal form which is easily removed by subsequent vacuuming.

- **Used for all encapsulating systems including bonnet and brush**
- **Dries to an encapsulated crystal form**
- **Maintains carpet to a high appearance level**
- **Continues cleaning with normal vacuuming**
- **No Sticky residues**
- **Releases and suspends soils from carpet fibres**
- **Available in: 4 L (1.06 US gal.), 20 L (5.28 US gal.) or 205 L (54.1 US gal.)**

## ENCAP EC CONTINUES TO CLEAN EVERY TIME YOU VACUUM

### **DIRECTIONS FOR USE:**

Pretest in an inconspicuous location for color fastness and fibre stability. Shake well before using.

For best results vacuum carpet prior to cleaning.

Mix 8 oz (236 ml) of Encap EC with 1 gallon (3.78 L) of warm to hot water (1:16 Dilution).

Apply diluted Encap EC using a pump-up sprayer or a machine employing a spray system with agitation. Spray mixed solution evenly over carpet, moistening the surface. Allow 5 minutes dwell time, do not allow cleaning solution to dry on carpet before using cleaning method.

**Keep this product out of reach of children. Read the Material Safety Data Sheet and Product Label before using. Take the necessary precautions dictated by the label to ensure that your health and that of your customers' is protected.**

**Diluted pH: 9.4**  
**Dilution Ratio: 1:16**

Using a bonnet pad system, buff with a clean bonnet pad to absorb soil.

Using a brush system, brush treated areas to loosen, emulsify and suspend soil. Allow carpet to dry, then vacuum to remove remaining encapsulated soil.

One gallon of mixed solution will cover approx. 800-1000 sq. ft. of carpet. Coverage may vary depending on soil conditions.
